Discussion findings

Lightning talks presenting our OSSD (Open Space-Style Discussion) Sessions

Thanks to the amazing attendees who came to a conference and were told in the morning that not only did we have to carve out what our industry means when we talk about observability, but also throw together a slide deck about it by the end of the day. This is what we made together.

Discovery

Summary

Discovery's place in the benevolent cycle of Suffering Driven Development

Interesting takeaways

Approaching discovery as inputs and outputs (and inputs)

Inputs: onboarding, proximity, data model, 80% documentation, push standards

Dashboards: useful vs eye candy, reports, trends & prediction

Alerts: incidents / bad things (boo) & KPI's / good things (yay)

Feedback = Decrease in Suffering

Call to action

Automation & Factory Settings

Cross-Technology Visualization (cloud, apps, services, code, ci, developer)

Opportunities for Orchestration
